GENERAL LIQUIDS CANADA

Customizing Asphalt

General Liquids Canada Ltd. is well equipped to supply standard asphalt cement as well as various grades of modified asphalt to the hot mix industry across the Maritime Provinces. Our technical team will be happy to assist in the appropriate selection of products as well as work with you to formulate a custom product to meet your needs.

Products for Construction

For new construction, or roads requiring reconstruction, there are several options in asphalt cement depending on your requirements and budget. Let General Liquids help you select the best product for your project.

Problem, or challenge	Standard Asphalt	Polymer Modified	Warm Mix Additive 	Emulsion Mix
High Stress Environments (Heavy Loads, Busy Intersections, Airports)				
Standard Paving Requirements (Common Roads, Reconstruction)				
Low Stress Environment (Residential Streets, Rural Roads)				
Extreme Paving (Late Season, Long Distance)				
Environmentally Sensitive (Residential, Emissions)				

-  Best life cycle/cost option
-  Good balance between economics and performance
-  Will perform, however other more economical solutions available
-  Not economically viable or technically advisable

Innovation in Action

A division within the Municipal Group of Companies, General Liquids Canada serves a variety of clients within the construction industry, including road builders, industrialists and other business-to-business users of bitumen-based products. Our products and services are backed by:

- a team of skilled technicians and operators
- a modern emulsion production facility
- an efficient and automated terminal
- a comprehensive testing/research laboratory

GLC also provides material performance research to promote new and more effective ways of constructing, sealing and preserving roads and structures. We continually strive to develop new, performance-based products that are eco-friendly, energy efficient and cost effective.

General Liquids Canada is an ISO 9001 (quality), 14001 (environmental) and AASHTO (laboratory) accredited facility.
